Palus Shikshan Prasarak Mandal's

ARTS, COMMERCE AND SCIENCE COLLEGE, PALUS

Department of Statistics

ACADEMIC YEAR: 2022-23

Course Outcomes (C. O.)

Class: B. Sc. - I

Course: Statistics Paper-I Descriptive Statistics

The students will acquire knowledge of

- 1. meaning and scope of Statistics, various statistical organizations,
- 2. data and types of data, various data presenting methods,
- 3. population, sample and various methods of sampling,
- 4. various measures of central tendencies and dispersion,
- 5. moments, skewness and kurtosis

Course: Statistics Paper-II Elementary Probability Theory

The students will be able to:

- 1. distinguish between random and non-random experiments
- 2. acquire knowledge of concepts of probability
- 3. use the basic probability rules, including additive and multiplicative laws,
- 4. understand concept of conditional probability and independence of events,
- 5. understand concept of univariate random variable and its probability distributions,
- 6. acquire knowledge of mathematical expectation of univariate random variable.

Course: Statistics Paper-I Descriptive Statistics-II

Students will acquire knowledge of:

- 1. correlation coefficient and interpret its value,
- 2. regression coefficients, interpret its value and use in regression analysis,
- qualitative data including concept of independence and association between two attributes,
- 4. vital statistics and concept of mortality and fertility and growth rates.

Course: Statistics Paper-IV Discrete Probability distributions

Student will be able to acquire knowledge of:

- 1. Bivariate discrete distributions, independence of bivariate r. v.'s, Mathematical expectation of bivariate discrete random variable.
- 2. one point distribution, two point distribution, Bernoulli distribution,
- 3. Uniform distribution, Binomial distribution, Hyper geometric distribution,

4. Poisson distribution, Geometric distribution and Negative binomial distribution.

Course: Statistics Practical Paper-I

Students will able to:

- 1. Acquire knowledge of computations using MS-Excel.
- 2. Represent statistical data diagrammatically and graphically.
- 3. Compute various measures of central tendency, dispersion, moments, skewness and kurtosis.
- 4. Compute correlation coefficient, regression coefficients.
- 5. Understand consistency, association and independence of attributes.
- 6. Interpret summary Statistics of computer output,
- 7. Know applications of some standard discrete probability distributions.
- 8. Compute the various fertility rates, mortality rates and growth rates.

HEAD

Department of Statistics

A. C. S. College, Palus

B. Sc. II (Statistics)

Course: Statistics Paper-V Probability distributions-I

The students will be able to

- 1. Understand concept of discrete and continuous probability distributions with real life situations.
- 2. Distinguish between discrete and continuous distributions.
- 3. Find the various measures of random variable and probabilities using its probability distribution.
- 4. Know the relations among the different distributions.
- 5. Understand the concept of transformation of Univariate and bivariate continuous random variable.

Course: Statistics Paper-VI Statistical Methods-I

The students will be able to:

- 1. Understand the concept of Multiple Linear Regression.
- 2. Understand the concept of Multiple Correlations and Partial Correlation.
- 3. Know the concept of sampling theory.
- 4. Understand the need of vital statistics and concept of mortality and fertility.

Course: Statistics Paper-VII Probability distributions-II

The students will be able to:

- 1. Know some standard continuous probability distributions with real life situations.
- 2. Distinguish between various continuous distributions.
- 3. find the various measures of continuous random variable and probabilities using its probability distribution.
- 4. Understand the relations among the different distributions.
- 5. Understand the Chi-Square, t and F distributions with their applications and inter relations.

Course: Statistics Paper-VIII Statistical Methods-II

The students will be able to:

- 1. Know the concept and use of time series.
- 2. Understand the meaning, purpose and use of Statistical Quality Control, construction and working of control charts for variables and attributes.
- 3. Apply the small sample tests and large sample tests in various situations.

Course: Statistics Practical Paper-III and Paper-III

Students will be able to:

- 1. Compute probabilities of standard probability distributions.
- 2. Compute the expected frequency and test the goodness of fit.
- 3. Understand how to obtain random sample from standard probability distribution and sketch of the p. m. f. / p. d. f. for given parameters.fit plane of Multiple regression and compute Multiple and Partial correlation coefficients.

- 4. Draw random samples by various sampling methods.
- 5. Construct various control charts.
- 6. Understand the applications of Poisson, Geometric and Negative Binomial distributions.

HEAD
Department of Statistics
A. C. S. College, Palus

B. Com.-II (Statistics)

Course: Business Statistics-I

After completion of this course, the students will be able to:

- 1. Explain the scope of statistics in business, perform classification and tabulation, and represent the data by means of simple diagrams and graphs.
- 2. Explain and apply sampling techniques in real life.
- 3. Summarize data by means of measures of central tendency and dispersion.
- 4. Explain the merits and demerits of various measures of central tendency and dispersion.
- 5. Perform analysis of bivariate data using simple linear regression.

Course: Business Statistics-II

After completion of this course, the students will be able to:

- 1. Compute unconditional and conditional probabilities and apply laws of probabilities.
- 2. Identify the applications of Binomial and normal probabilities.
- 3. Measure trend and seasonal variations in time series data.
- 4. Compute and interpret simple and weighted index numbers.
- 5. Construct and apply variable and attribute control charts.

Palus Shikshan Prasarak Mandal's ARTS, COMMERCE AND SCIENCE COLLEGE, PALUS PROGRAM OUTCOMES

SR. NO.	PROGRAMME	PROGRAM OUTCOMES
		After the completion of the B. A. Programme, the students will be able:
		1. To develop capabilities of communication skills
		2. To understand knowledge in the field of humanities.
1	B.A.	3. To be cultured and good citizen of India
		4. To get employment
		5. To use soft skills
		6. To be social and culturally aware
		7. To make all round personality development of the learners
		8. To develop conscious leaders and problem solvers.
		After the completion of the B. Com. Programme, the students will be
		able:
2	B.COM.	1. To understand the principal and areas of management.
		2. To acquire entrepreneurship qualities and skills.
		3. To understand basic accounting knowledge as applicable to business.
		4. To accept the changing role of business in the process of Globalization.
		5. To understand basic knowledge of statistical techniques applicable to
		business.
		6. To understand the concepts in Insurance, Banking, Marketing and e-
		commerce,

		After the completion of the B. Sc. programme, the students will be able to:
		1. develop inquiring minds and curiosity about science and the natural
		world
		2. acquire knowledge, conceptual understanding and skills to solve
		problems and make informed decisions in scientific and other contexts
		3. develop skills of scientific inquiry to design and carry out scientific
		investigations and evaluate scientific evidence to draw conclusions
		4. communicate scientific ideas, arguments and practical experiences
	B.Sc.	accurately in a variety of ways
3		5. think analytically, critically and creatively to solve problems, judge
		arguments and make decisions in scientific and other contexts
		6. appreciate the benefits and limitations of science and its application in
		technological developments
		7. understand the international nature of Science and the interdependence
		of science, technology and society, including the benefits, limitations
		and implications imposed by social, economic, political, environmental,
		cultural and ethical factors
		8. demonstrate attitudes and develop values of honesty and respect for
		themselves, others, and their shared environment.

PROGRAM SPECIFIC OUTCOMES AND COURSE OUTCOMES

SR. NO.	PROGRAM SPECIFIC	PROGRAM SPECIFIC OUTCOMES
		To understand importance of language in day to day like
		2. To understand appreciate Marathi literature
1	MARATHI	3. To learn various forms of Marathi literature
		4. To get interest in reading Marathi literature.
		5. To understand to creative process and nature of literature
		6. To be teacher/professor/translator/writer/reporter/interpreter/editor
		7. To know difference formal and internal use of language.
		To prerogative Hindi as national language.
2	HINDI	2. To make use of Hindi in day-to-day life
		3. To know Hindi literature and its various forms.
		4. To know the difference between formal and informal use of language
		5. To develop communication skill in Hindi
		6. To be teacher in specific language

_		
		After completion of this course, students would be able to:
		1. Enhance their linguistic competence.
3	ENGLISH	2. Describes object, people and places.
		3. Improve writing and speaking skills.
		4. Improved literary competence through short stories, poems and essays.
		5. Understand the process the creative writings in English
		1. To get acquainted with the history of Maratha
		2. To study the comprehensive history of Chhatrapati Shivaji
		3. To understand events of freedom movement of India & the contribution
		of the freedom fighters.
		4. To comprehend the history of world revolution.
4	HISTORY	5. To understand the role of social reformer.
		6. To understand the history of ancient India.
		7. To comprehend modern history of Maharashtra.
		8. To study of history various countries in the world.
		9. To understand the change & impact of revolutionary movement.
		1. To acquaint the students with distinct dimensions of India.
		2. To understand the physical setup of the country.
5	GEOGRAPHY	3. To focus the climate of India and mechanism of monsoon of India.
		4. To get information about soils in India.
		5. To get information about vegetation in India.
		1. To introduce the students to the Indian economy.
		2. To develop an understanding of challenges facing the Indian economy.
		3. To acquaint the students with structure of the Indian economy and
6		changes taking place there in.
	ECONOMICS	4. To acquaint the students with the policies and performance of major
		sectors in Indian Economy.
		5. To explain the economic reforms introduced in India since 1991.
		After completion of this course, students would be able to
		1. Understand the political theories
		2. Understand thoughts and biographies of great political thinkers
		3. Understand structures, functions and the working of political institutes
		in India
7	POLITICAL SCIENCE	4. Understand the structure of constitution of India
		5. Pursue Master courses in Political Science, Education and Social Work.

PROGRAM SPECIFIC OUTCOMES (PSO) (B.COM.)

SR. PROGRAM SPECIFIC NO. NAME	PROGRAM SPECIFIC OUTCOMES
INSURANCE	 To Impart the knowledge of the principles of Life Insurance and their importance. To give exposure to the provisions of fire and Marine Insurance and their increasing importance. To provide skill and knowledge to become an insurance Agent. To understand various rules and regulations required for insurance business
3 ACCOUNTANCY	 Student will demonstrate progressive effective domain development of values, the role of accounting in society and business. Student will learn relevant financial accounting carrier skill, applying both quantitative and qualitative knowledge to their future carrier in business. Student will learn relevant management accounting carrier skill, applying both quantitative and qualitative knowledge to their future carrier in business. Student will be able to demonstrate progressive learning of various tax issue various tax form s relating to individual student will able to demonstrate knowledge in setting up a computerized set of accountancy books. Learners will gain through systematic and subject skill within various disciplines of commerce, business, accounting, economics, finance, auditing, banking and marketing. Learners will be able to recognize future and role of business entrepreneurs, managers, consultants, which will be help learners to posses knowledge and other soft skill and to react aptly when conformed to critical decision making. Learners will able to prove proficiency with the ability to engage in competitive exams like CA, ICWA, CS, and other courses. Learners will acquire the skill like effective communication, decision making, problem solving in day to day business affairs. Learners will involve in various co-curricular activities to demonstrate relevancy of fundamental and theoretical knowledge of their academic major and to gain practical. Learners can also acquire practical skill of work as tax consultant, audit assistant and other financial supporting services. Learners will be able to do higher education and advance research in the field of commerce and finance.

6. Communicate ethically.	
7 Demonstrate positive group	communication exchanges.

	 	
		1. Communicate the major concepts in the functional areas of
		accounting, marketing, finance, information technology, and
		management.
8	MANAGEMENT IN	2. Describe the legal, social, ethical, and economic environments of
	BUSINESS SERVICES	business in a global content.
		3. Solve organization problems, individually and/or in teams, using
		quantitative, qualitative, and technology-enhanced approaches.
		4. Demonstrate professional communication and behavior.
		5. Apply knowledge of business concepts and functions in an integrated
		manner.
		1. Critically analyze and provide recommendations to improve the
		operations of organizations through the application of management
		accounting techniques.
		2. Demonstrate mastery of costing systems, cost management systems,
		budgeting systems and performance measurement systems.
9		3. Demonstrate the need for a balance between financial and non-
	MANAGEMENT	financial information in decision making, control and performance
	ACCOUNTING	evaluation applications of management accounting.
		4. Evaluate the costs and benefits of different conventional and
		contemporary costing systems.
		5. Learn independently and to demonstrate high level personal
		autonomy and accountability.
		6. Learn within teams - to co-operate with team members, to assume
		leadership and
		7. Mortgage differences and conflicts.
		1. Exhibit good communication skills in the management of personnel
	PRODUCTION	and business relationships:
10	MANAGEMENT	2. Establish procedures for overseeing a production budget;
		3. Coordinate the crewing and casting of a production flow;
		4. Manage a production schedule
		5. Identify the role of supply and demand in a market economy.
		6. Identify the necessary conditions for market economies to function
		well.
		7. Discuss market system advantages and pricing.
		8. Understanding of the economic role of government policy and the
11	BUSINESS	Federal Reserve
	ECONOMICS	9. Define and analyze economic problems using algebraic and statistical
	(MACRO)	methods.
		10. Identify the benefits and costs of a global economy.
		11. Identify the role of supply and demand in a market economy.
		12. Identify policy options and their effectiveness.
		13. Understanding importance of international relations to trade and
		finance.

12	ENTREPRENEURSHIP DEVELOPMENT	 Understand the basic development of entrepreneurship as a profession. Understand business models. Write a business plan describing a new business venture. Understand marketing strategies for small businesses. Identify capital resources for new ventures and small businesses. Monitor the performance of a new firm. Have a basic knowledge of human resource management for small business. Understand the social responsibilities of small business managers.
13	BUSINESS STATISTICS	 After completion of this course, the student will be able to Explain the scope of statistics in business, perform classification and tabulation, and represent the data by means of simple diagrams and graphs. Explain and apply sampling techniques in real life. Summarize data by means of measures of central tendency and dispersion. Explain the merits and demerits of various measures of central tendency and dispersion. Perform analysis of bivariate data using simple correlation and simple linear regression. Compute unconditional and conditional probabilities and apply laws of probabilities. Identify the applications of Binomial and normal distributions. Measure trend and seasonal variations in time series data. Compute and interpret simple and weighted index numbers. Construct and apply variable and attribute control charts.
14	FINANCIAL MANAGEMENT	 Demonstrate understanding of the finance function Demonstrate understanding of the goals of the finance manager Identify the basic financial environment and institutions Perform analytical reviews of financial results, proposals, and plans Identify funding sources, instruments, and markets Demonstrate knowledge of the value of money over time and its uses Demonstrate knowledge of a basic financial vocabulary

15	PRACTICE IN MODERN MANAGEMENT	 Graduates will demonstrate the ability to communicate effectively both orally and in writing. Graduates will demonstrate knowledge of the legal and ethical environment impacting business organizations and exhibit an understanding and appreciation of the ethical implications of decisions. Graduates will demonstrate an understanding of and appreciation for the importance of the impact of globalization and diversity in modem organizations. Graduates will demonstrate an ability to engage in critical thinking by analyzing situations and constructing and selecting viable solutions to solve problems. Graduates will demonstrate an ability to work effectively with others.
16	RESEARCH METHODOLOGY	 Students should understand a general definition of research design. Students should know why educational research is undertaken, and the audiences that profit from research studies. Students should be able to identify the overall process of designing a research study from its inception to its report.
17	RECENT TRENDS IN MARKETING	 Information literacy skills in searching for information related to the theory and practice of management Professional business writing Interviewing skillsinterviewing a practicing manager and presenting written and oral reports that integrate information literacy, analysis and synthesis of the manager's activities, critical thinking, and reflections.
18	FOUNDATION OF BUSINESS LAW AND TAX LAW	 Demonstrate understanding of the basic American Legal System Demonstrate knowledge of basic court procedures Demonstrate understanding of the nature of tort law, including business torts Demonstrate how criminal law relates to business Demonstrate recognition of intellectual property Identify how computer law affects business Analyze the nature and terminology of contract law Demonstrate recognition of the requirements of the contract agreement Demonstrate understanding of contract consideration and capacity Demonstrate recognition of the genuineness of assent in contract formation. Demonstrate understanding of legality and Statute of Frauds in contracts

	1		
		1.	Create a budget, and develop money management, and problem
			solving skills.
	FOUNDATION OF		Describe employment skills, strengths, and deficits.
19	HUMAN SKILL	3.	State educational goals.
		4.	Depict current contemporary issues regarding culture, ethnicity,
			health, sexuality, resiliency, coping, identity, self-esteem, and
			nutrition.
		5.	Locate and describe one community resource in the surrounding area.
		6.	Describe and visit one independent living setting.
		1.	Conduct an environmental scan to evaluate the impact pf world issues
			on an organization's international business opportunities.
		2.	Conduct, evaluate and present market research to support an
			organization's international business decision-making.
		3.	Manage the preparation of documents and the application of
			procedures to support the movement of products and services in the
			organization's global supply chain.
		4.	Evaluate the impact of statutory and regulatory compliance on an
20	INTERNATIONAL		organization's integrative trade initiatives.
	BUSINESS	5.	Develop and implement strategies to negotiate effectively within
			various cultural environments and to address the impact of cultural
			differences on on organization's integrative trade initiatives.
		6.	Develop and present an international marketing plan, and evaluate
			sales strategies that support an organization's integrative trade
			initiatives.
		7.	Identify and interpret relevant international financial documents, and
			evaluate financial strategies that support an organization's integrative
			trade initiatives.
		8.	Analyze the impact of an organization's integrative trade initiatives on
			its human resources management strategies, policies and practices.
	1		

PROGRAM SPECIFIC OUTCOMES-(B.Sc.)

SR.	PROGRAM SPECIFIC	
NO.	NAME	PROGRAM SPECIFIC OUTCOMES
		To promote understanding of basic facts and concepts in chemistry
		while retaining the excitement of chemistry.
		2. To make student capable of studying chemistry in academic and
		industrial course.
		3. To expose the students to various emerging new areas of chemistry and
		apprise
		4. them with their prevalent in their future studies and their application irl
		various spheres of chemical service.
		5. To develop problem solving skill in students.
		6. To expose students to different processes used in industries and their applications.
	CHEMISRTY	7. To develop ability and to acquire the knowledge of terms, facts,
		concepts, processes, techniques and principles of subjects.
1		8. To develop ability to apply the knowledge of contents of principles of chemistry.
		9. To acquires new knowledge of chemistry and developments there in.
		10. To expose and to develop interest in the field of chemistry.
		11. To develop proper attitude towards the subject
		12. To develop the power of appreciation, achievement in chemistry and the role in nature and society.
		13. To develop skills required in chemistry such as proper handling of
		apparatus and chemicals.
		14. To acquaint properly with recent instrumental techniques used in
		industry.
		15. To build a personality of student as chemist.

		1. Students became aware of concepts in algebra like complex analysis, Matrices etc.
		2. They can use these concepts in various examinations
		3. Students learn the use of differentiation and applications, Leibnitz's
		rule and its applications
5	MATHEMATICS	4. Students team concepts of sphere, polar co-ordinates
		5. Students know the concepts of order, Degree of differential equations,
		Solutions of
		6. first order, first degree
		7. Students learn the various concepts like Jacobian, Extreme values,
		Vectors etc.
		8. Students became aware of solutions of differential equations of
		homogeneous D.E., Second order D.E., Total D. E. etc. 9. Students practice the concept of double and triple integration, Beta and
		gamma
6.	COMPUTER SCIENCE	After completing the B.Sc. (Computer Science) course the students would be
		able to:
		Understand the multiple levels of detail and abstraction
		2. Recognize the context in which a computer system make function,
		including its interaction with people and the physical world.
		3. Communicate with, and learn from, expert from different domains
		throughout their careers.
		4. Possess a solid foundation that allows and encourages them to maintain
		relevant skills as the field evolves.
		5. To be able to manage their own career development and advancement,
		manage their own learning and development, including managing type,
		priorities, and progress.
		6. Demonstrate understanding of the principles and working of the
		hardware and software aspects of computer systems.
		7. Ability to understand the structure and development methodologies of
		software systems
		8. Possess professional skills and knowledge of software design process.
		familiarity and practical competence with a broad range of
		programming language and open source platforms.

Palus Shikshan Prasarak Mandal's

ARTS, COMMERCE AND SCIENCE COLLEGE, PALUS

Name of Programme: Bachelor of Business Administration (B. B. A.)

The **Programme Outcomes** (PO) of the programme B. B. A. are as follows:

After completing the B. B. A. course the students would be able to:

- 1. Identify the different functional aspects of business world and recognize different opportunities of business.
- 2. Acquire the different skills necessary for the professional attitudes.
- 3. Demonstrate a global outlook with the ability to identify aspects of the global business and cross cultural understanding.
- 4. Identify the problems and challenges and inculcate the capability to cope with the spontaneous changes.
- 5. Analyze the importance of innovation and research, tackle the contemporary needs and accordingly grab the opportunities.
- 6. Develop effective and oral communication especially in business applications, with the use of appropriate technology.

Program Specific Outcomes (PSO) of the programme B. B. A. are as follows:

After completing the BBA course the students would be able to:

- 1. Acquire the managerial professional attributes and be capable of decision making by applying the knowledge of management discipline.
- 2. Explore the entrepreneurial quality and start new business venture with innovative ideas.
- 3. Prepare students to undertake post graduation management programme.

	B.Sc- I [CS] Semester-I		
Sr. No	Name of the Course	Course Outcomes	
1	Fundamentals of Business Management	 Students should be able to know, comprehend, apply, analyze, synthesize and evaluate the basic fundamentals of managing organizations. Students will complete specific activities, as identified in the syllabus, related to each of the four functions of management: planning, organizing, leading and controlling. Have developed a working knowledge of fundamental terminology and frameworks in the four functions of management: Planning, Organizing, Leading and Controlling. Be able to analyze organizational case situations in each of the functions of management; Be able to identify and apply appropriate management techniques for managing contemporary organizations; and Have an understanding of the skills, abilities, and tools 	
		needed to obtain a job on a management track in an organization of their choice	
2	Principles of Marketing	 Understand the fundamentals of marketing. Aware of the 4P's & 4C's of marketing mix. Understand the consumer behavior and importance of market segmentation 	
3	Micro Economics	1. Learners will be able to explain meaning and scope of business economics 2. Learners will apply the concept and theories of demand and consumer behaviors' 3. Learners will apply concepts of factor pricing and production function in business practices 4. Learners will understand different markets and its pricing practices	
4	Information Technology in Business	 Understand basics of computer technology. Identify software and networking technology for business.

discussion			discussion	

	3. Develop presentation skills		
		4. Understand different modern office communication tools	
	В.	B. A II Semester-III	
Sr. No.	Name of the Course	Course Outcomes	
1	Fundamentals of Entrepreneurship	1. Have a fair idea about aspects of entrepreneurship	
	Entrepreneursmp	development	
		2. Understand the role of entrepreneurs, and the importance	
		of entrepreneurship with the challenges and opportunities.	
		3. Get acquainted with different theories of entrepreneurship	
		4. Understand the concept and role of woman entrepreneurs	
		5. Understand the concept of rural and social entrepreneurship	
2	Cost Accountancy	1. Describe concepts in Cost Accountancy	
		2. Analyze methods of Costing, Cost Levels and methods of	
		pricing material issues, Inventory Control Techniques	
		3. Define application of Marginal Costing Technique in	
		decision making	
		4. Discuss Cost Audit and Cost Control Technique.	
3	Services marketing	1. Compare goods and services	
		2. Demonstrate 7 P's of service marketing	
		3. Application of 7 P's for various service organizations	
		4. Develop 7 P's of marketing for a service organization	
4	Forms of Business	1. Understand different forms of business organization.	
	Organization	2. Classify different sources of finance available & its	
		influence on business decisions.	
		3. Illustrate different combinations of business.	
	4. Understand new trends in management		
5	Statistical	1. Define descriptive Statistical techniques	
	techniques	2. Describe applications of statistical techniques.	
		3. Apply suitable statistical formula and calculate result.	
		4. Conclude degree of relationship of two variables and	
		estimate unknown variable.	
	В.	B. A II Semester-IV	

		4. Understand the process of preparation of business plan
2	Management Accounting and Reporting Accounting 1. Understand Management Accounting and Reporting management	
		2. Understand tools and techniques of Management
		Accounting
		3. Understand Financial Statement Analysis
3	rural and retail marketing	1. Develop understanding of concepts of rural and retail
	mar ketting	marketing.
		2. Understand the current situation of rural marketing.
		3. Analyze the marketing of agricultural inputs and products
		4. Understand retail formats, retail buying behavior and retail
		marketing mix
4	Research Methodology	1. Define various terms used in research process
	Methodology	2. Describe research design, sample design and sampling
		methods
		3. Apply appropriate methods for data collection for research
		work
		4. Use appropriate statistical tools for data analysis and
		interpretation
5	Statistics for decision making	1. Define tools Statistics used for decision making
	decision making	2. Describe applications of statistics for decision making.
		3. Apply suitable statistical formula and estimate trend.
		4. Construct control charts
	В	4. Construct control charts B. A III Semester-V
Sr. No.	Name of the Course	
Sr. No.	Name of the Course Fundamentals of	B. A III Semester-V Course Outcomes
	Name of the Course	B. A III Semester-V

		2. Understand the salient features and importance of	
		differentbusiness laws.	
		Get acquainted with different provisions of business laws.	
2	Human Skills	3. After Completion of the course students will be able	
	(compl.)	to:	
		Develop different human skills among students	
		2. Enhance quality behavior.	
		3. To increase Emotional Quotient by learning values.	
		4. Understand about conflict management and	
		stressmanagement	
		5. Beneficial to cultivate professional skills among the	
		management students and make them persons with empathy.	
		Understand about Career Management and career opportunities in Management	
3	Management	On Completion of this course students will be able to:	
	Historians (compl.)	Understand evolutionary phases of management approaches	
		2. Understand contribution of management historians	
		3. Evaluate role of historian in developing	
		science ofmanagement	
4	Digital Marketing	At the end of the course the student should be able to:	
	(Opt.)	1. Learn the applications of Digital Marketing	
		2. Analyze the different digital marketing avenues.	
		3. Examine digital marketing tools. Build real life problems in the domain of digital marketing	
5	Financial		
	Management (Opt.)	4. After Completion of the course students will be able	
		to:	
		1. To understand the basic concepts Financial Management	
		2. To know about components of Working	
		CapitalManagement	
		3. To understand Capital Structure ,Cost of	
		Capital andLeverage	

6 Human Resource		After completion of the course students will be able to:
	Planning (opt.)	1. Understand the various functions of HRM.
		2. Describe the Human Resource Planning Process.
		3. Understand the Recruitment function in detail.
		4. Describe the Selection process
		5. Analyze the employee separation method.
	В.	B. A III Semester-VI
Sr. No.	Name of the Course	Course Outcome
1	Fundamentals of Taxation (Compl.)	After Completion of the course students will be able to:
		1. To understand the basic concepts in Taxation
		To demonstrate the computation of income and tax liability
		3. To understand concept of GST and its mechanism
2	Business Ethics (Compl.)	After Completion of the course students will be able to:
	(Compi.)	1. Apply those skills to the real and current
		challenges ofBusiness and professions.
		2. Differentiate between ethical and unethical
		behavior of Managers, employers and employees.
		3. Adopt ethical practices in their field of work and life
3.	Organizational	After Completion of the course students will be able to:
	Behaviour (Compl.)	Understand the basic concepts of OB
		2. Understand the principles of learning
		3. Describe the importance of attitude and values
		4. Implement the theories of Motivation and Personality.
		5. Understand and implement causes of stress and
		copingstrategies
4.	International After Completion of the course students will be	
	Marketing (opt.)	able to:1 .Understand basics of international
		marketing.
		2. To provide students with a perspective of

B. B. A.

		International Marketing management, its environment	
		and complexities.	
		3. Study international marketing strategies.	
		4. Study functions of international trade.	
5.	Business Finance	After Completion of the course students will be	
	(Opt.)	able to:	
		1.To understand the basic concepts Business	
		Finance	
		2. To recognize Financial Markets, Mutual Funds,	
		PortfolioManagement and Micro Finance	
		To understand Corporate Restructuring and its ways.	
6.	Human Resource	After Completion of the course students will be able	
	Development (Opt.)	to:	
		1. Understand the difference between HRM & HRD	
		Concepts.	
		2. Understand the various subsystems involved in	
		HumanResource development.	
		3. Describe and differentiate Training &	
		development function.	
		4. Understand the methods of performance appraisal	
		Analyze the career development techniques	

Palus Shikshan Prasarak Mandal's

ARTS, COMMERCE AND SCIENCE COLLEGE, PALUS.

Name of the programme:- BCA(Bachelor of Computer Application)

The **Programme Outcomes** (PO's) of the programme B.C.A are as follows:-

After completion of program Students / graduates will be able to:

PO1: Apply knowledge of ICT in solving business problems.

PO2: Learn various programming languages and custom software.

PO3: Design component, or processes to meet the needs within realistic constraints.

PO4: Identify, formulate, and solve problems using computational temperaments.

PO5: Comprehend professional and ethical responsibility in computing profession.

PO6: Express effective communication skills.

PO7: Recognize the need for interdisciplinary, and an ability to engage in life-long learning.

PO8: **PO9**: Utilize the techniques, skills and modern tools, for actual development process.

Programme Specific Outcomes (PSO) of the programme B.C.A are as follows:- After Completing the BCA Course the students would be able to:

- 1. Acquire the techniques, skills and modern tools, for actual development Process.
- 2. Prepare Students to undertake post graduation computer programme.
- 3. Explore Knowledge of contemporary issues and emerging developments in computing profession.

BCA-I Semester-I		
Sr.No	Name of the course	Course Outcome
1	Course Code: CC 101 Fundamentals of Computer	Course Outcomes After completion of these course students will be able to - 1. Understand basic concepts of computer. 2. Describe peripheral devices and number systems. 3. Understand operating environment 4. Demonstrate the use of Linux Operating system commands
2	Course Code: CC 102 Introduction to Programming using 'C	Course Outcomes after Completion of this course the student will be able to - 1. Able to implement the algorithms and draw flowcharts for solving Mathematical problem. 2. Ability to design and develop Computer programs, analyzes, and interprets the concept of pointers, declarations, initialization, operations on pointers and their usage. 3. Able to define data types and use them in simple data processing applications also he/she must be able to use the concept of array of structures and file Handling. 4. Develop confidence for self education and ability for life-long learning needed for computer language.
3	Course Code: ACE 103 Principles of Management	Course Outcomes After completion of these course students will be able to - 1. Understand the influence of historical forces on current practice of management. 2. Understand frameworks in the four functions of management. 3. Understand leadership styles to anticipate the consequences of each leadership style 4. Be able to identify and apply appropriate management techniques for organizations; and 5. Understand social responsibility involved in business situations
4	Course Code: ACE 104 Business Communication	Course Outcomes After completion of this course students will be able to - 1. Communicate in English in written as well as oral

		mode
		2. Make presentations in English
		3. Do effective business correspondence
5	Course Code:	Course Outcomes After completion of this course
	AEC 105	students will be able to -
	Office Automation	1) Understand the components of office automation
		2) Perform operations using MS Word and
		PowerPoint 2) Surf details through Internet
		3) Surf details through Internet4) Understand and discuss about the use of Office
		Package and
		internet in daily life
		internet in daily me
	BCA	-I Semester-II
1	Course Code:	Course Outcomes After completion of this course
	CC201	students will be able to -
	Database Management	1) Describe the basic concepts of DBMS and
	System	various databases
	System	used in real applications
		2) Demonstrate the principles behind systematic
		database design
		approaches.
		3) Design the database structure by applying the
		concepts of Entity-
		relational model and Normalization.
		4) Learn MS-Access for database creation and
		handling
		transactions
2	Course Cada	Course Outcomes After countries of this
2	Course Code:	Course Outcomes After completion of this course
	CC202	students will be able to -
	Operating System	1) Describe the basic concepts of DBMS and
		various databases
		used in real applications
		2) Demonstrate the principles behind systematic
		database design
		approaches.
		3) Design the database structure by applying the
		concepts of Entity-
		relational model and Normalization.
		4) Learn MS-Access for database creation and
		handling

		transactions
3	Course Code:	Course Outcomes After completion of this course students will able to - 1) Understand object-oriented programming and advanced C++ concept. 2) Apply the concepts of object, classes and constructor. 3) Design C++ Programs based on object, class, inheritance, abstraction, encapsulation, dynamic binding and polymorphism. 4) Implement concept of polymorphism in program.
4	Course Code: AEC 204 Financial Accounting with Tally	Course Outcomes After completion of this course students will able to – 1. Use basic accounting terminology, procedures and systems of maintaining accounting records. 2. Understand financial statements 3. Learn to create company, enter accounting voucher entries and also print financial statements, etc. in Tally. 4. Demonstrate MIS reports in Tally ERP.
5	Course Code: AEC 205 Mathematical Foundations For Computer Applications	Course Outcomes After completing this course, students should demonstrate competency in the following skills: 1) Basic knowledge of set theory, functions and relations concepts, matrix needed for designing and solving problems. 2) Construct simple mathematical proofs and possess the ability to verify them. 3) Write an argument using logical notation and determine if the argument is valid or is not valid. 4) Use graph algorithms to solve problems.

	BCA-II Semester-III		
Sr.No	Name of the course	Course Outcome	
1	Course code: CC 301 Web Technology	Course Outcomes After completion of this course student should be able to- 1. Understand basics of website and web development life cycle. 2. Design website using HTML and CSS 3. Implement client side scripting for website development 4. Understand importance and working of HTML5	
2	Course code: CC 302 Computer Network and Internet	Course Outcomes After completion of this course student should be able to- 1. Understand the concept of computer network. 2. Identify different components required to build different networks. 3. Recognize the functions of network layers and different protocols. 4. Discuss the important features of the Internet and Web	
3	Course code: CC 303 Data Structure using C	Course Outcomes After completion of this course student should be able to- 1. Use and implement appropriate data structure for the required problems using a programming language such as C. 2. Understand various searching & sorting techniques 3. Implementing various data structures viz. Stacks, Queues 4. Implementation of Linked Lists and Trees	
4	Course code: AEC304 Elements of Statistics	Course Outcomes After completion of this course student should be able to- 1) Explain various term used in Statistics. 2) Describe the Measures of Central Tendency and Dispersion 3) Understand Analysis of Bivariate data(Correlation and Regression) 4) Elaborate Sampling Techniques and Time Series Analysis.	

5	Course code: AEC305 Human Resource Management and Materials Management	Course Outcomes After completion of this course student should be able to- 1. Understand Human Resource Planning Process. 2. Elaborate Performance Appraisal, Training and Development, Wage and salary Administration. 3. Explain functions of material management 4. Demonstrate 5 R in purchasing and Inventory control techniques.
	BCA-I	I Semester-IV
1	Course Code: CC 401 RDBMS	Course Outcomes After completion of this course student should be able to- 1. Describe the fundamental elements of Relational Database Management Systems. 2. Explain various commands in data languages with example. 3. Understand various subqueries & joins. 4. Apply the control statements and stored procedures.
2	Course code: CC 402 Software Engineering	Course Outcomes After completion of this course student should be able to- 1. Understand life cycle models, requirement elicitation techniques, understand the concept of analysis and design of software. 2. Develop SRS document. 3. Use of analysis and design tools for system development. 4. Apply software engineering concepts in software development to develop quality software
3	Course code: CC 403 DOT NET Technology	Course Outcomes After completion of this course student should be able to- 1. Understand features of C# DOT NET 2. Implement various server controls for website development 3. Apply validation and state management for interactive website development 4. Design and develop dynamic web application

		using ADO.Net
4	Course code: AEC 404 Entrepreneurship Development	Course Outcomes After completion of this course student should be able to- 1. Define characteristics, function and types of entrepreneurs and know the role of Entrepreneurship in Economic Development. 2. Identify Business Opportunities and prepare business plan. 3. Know project finance agencies. 4. Understand New Opportunities and Challenges in digital entrepreneurship
5	Course Code: CCL405 PHP	Course Outcomes After completion of this course student should be able to- 1. Understand the environment of PHP programming Language. 2. Develop web applications using PHP.

	BCA-III Semester-V	
Sr.No	Name of the course	Course Outcome
1	Paper No. 501:	1. Critically analyse and provide
	Management Accounting	recommendations to improve the operations of organisations through the application of management accounting techniques. 2. Demonstrate mastery of costing systems, cost management systems, budgeting systems and performance measurement systems. 3. Demonstrate the need for a balance between financial and non-financial information in decision making, control and performance evaluation applications of management accounting. 4. Evaluate the costs and benefits of different
		conventional and contemporary costing systems.
2	Paper No. 502: E- Commerce	1. Analyze the impact of E-commerce on business models and strategy

		 Describe Internet trading relationships including Business to Consumer, Business-to-Business, Intra-organizational. Describe the infrastructure for E-commerce Describe the key features of Internet, Intranets and Extranets and explain how they relate to each other. Discuss legal issues and privacy in E-Commerce Assess electronic payment systems Recognize and discuss global E-commerce issues
3	Paper- 503 Computer Network	1.To understand the organization of computer networks, factors influencing computer network development and the reasons for having variety of different types of networks. 2.To design a network routing for IP networks. 3.To identify main internal PC components and connections. 4.To explain how a collision occurs and how to solve it. 5.To demonstrate proper placement of different layers of ISO model and illuminate its function. 6.To learn Internet structure and can see how standard problems are solved in that context. 7.To determine proper usage of the IP address, subnet mask and default gateway in a routed network. 8.To understand internals of main protocols such as HTTP, FTP, SMTP, TCP, UDP, IP 9.To analyze simple protocols and can independently study literature concerning computer networks.
4	Paper No. 504: RDBMS with Oracle	1.Understand, appreciate and effectively explain the underlying concepts of database technologies 2.Design and implement a database schema for a given problem-domain 3.Normalize a database 4.Populate and query a database using SQL

		DML/DDL commands.
		5.Declare and enforce integrity constraints on a database using a state-of-the-artRDBMS
		6.Programming PL/SQL including stored procedures, stored functions, cursors,packages.
		7.Design and build a GUI application using a 4GL
5	Paper No- 505 Visual Programming	1.Design, document, code and test small C# console and GUI applications. 2.Design, document, code and unit test class libraries as part of a larger project. 3.Use an object browser and .NET documentation to examine C# and the .NET framework namespace contents. 4.Use the Visual Studio IDE to create and debug application and class library solutions and projects. 5.Interpret UML class diagrams to create C# classes and applications
	BCA-II	II Semester-VI
1	Paper No.601 Strategic Management	1. know, understand, and apply the strategic management process to analyze and improve organizational performance. 2. The complementary learning outcomes are to be able to conduct and draw conclusions from external analyzes of an organization's environment. 3. To able to conduct and draw conclusions from internal analyzes of an organization's capabilities, formulate realistic strategies. 4. Develop implementation plans to execute those strategies.
2	Paper No. 602 Data Mining and Data Warehousing	 Identify the scope and necessity of Data Mining & Warehousing for the society. Describe the designing of Data Warehousing so that it can be able to solve the root problems.
		that it can be able to solve the root problems. 3. To understand various tools of Data Mining and

		their techniques to solve the real time problems. 4. To develop ability to design various algorithms based on data mining tools. 5. To develop further interest in research and design of new Data Mining techniques.
3	Paper No - 603: Linux Operating System	1.Basic Networking Concepts 2.Installation and basic handling of Linux System 3.Basic Configuration of various server like Web Server, DNS Server, Mail Server and Cache Server 4.Configuring and troubleshooting Host and Network Security in Linux System 5.Installing, configuring Bandwidth Management tool
4	Paper No-604: Java Programming	 Create Java programs that solve simple business problems. Validate user input. Construct a Java class based on a UML class diagram. Perform a test plan to validate a Java program. Document a Java program.

P.O.P.S.O.and C.O Page 10

Palus Shikshan Prasarak Mandal's

ARTS, COMMERCE AND SCIENCE COLLEGE, PALUS

Name of Programme: Bachelor of Computer Science Entire

The **Programme Outcomes** (PO) of the programme B.C.S. are as follows:

After completing the B.C.S. Course the students would be able to:

- 1. Understand the multiple levels of detail and abstraction
- 2. Recognize the context in which a computer system make function, including its interaction with people and the physical world.
- 3. Express effective communication skills.
- 4. Utilize the techniques, skills and modern tools, for actual development process.
- 5. Able to communicate with, and learn from, expert from different domains throughout their careers.

Program Specific Outcomes (PSO) of the programme B.C.S Are as follows:

After completing the B.C.S course the students would be able to:

- Ability to understand the structure and development methodologies of software Systems.
- 2. Possess professional skills and knowledge of software design process. Familiarity and Practical competence with a broad range of programming language and open source Platforms.
- 3. Explore Knowledge of contemporary issues and emerging developments in computing profession

	B.C.S- I Semester-I		
Sr.No	Course Name	Course Outcomes	
1	Discrete	1. Simplify & evaluate basic logic statement including	
	MathematicsI	compoud, implicatrion, inerse &converse statement	
		2. Understand the notation of mathematical thinging &	
		proof.	
		3. Write an argument using logical notation & detaremine	
		valid or not valid argument	
		4. To apprecitae the basic principles of boolean algebra	
2	Electronics Devices	1. Apply the concept of basic electronic device	
	and Circuits - I	2. Student should know basic electronic devices	
		1.Students will learn to use and configure essential office	
		applications including word processing, spreadsheets.	
	Introdcution to	2.Students will learn essential operating systems skills	
		including how to use, setup, configure, troubleshoot and	
	computer and data	maintain a current microcomputer operating system.	
	Processing - I	3.Students will develop a basic understanding of	
	1 Toccssing - 1	technologies and protocols used on the Internet, and how to	
3		effectively use Internet tools technologies including current	
		web-based applications, e-mail, and social networking tools;	
		developing searching strategies; and basic web authoring	
		1.Students will develop and apply concepts of expressions,	
		equations and inequalities to investigate and describe	
		relationships and solve problems.	
	Algebra	2.Understand the use of parameters and variables, including	
4		appropriate replacement sets. [Identify which symbols	
		represent parameters and which represent variables.	
		Represent situations with polynomials or equations. —-]	

		Show procedural fluency with polynomial expressions,
		including basic factoring. [Perform flexibly operations of
		adding, subtracting, and multiplying on polynomials.
		Perform limited division. Understand and perform limited
		factoring, such as common factors and difference of
		squares.]
		3.Use equations, inequalities, and systems of equations &
		inequalities to represent situations, and find solutions via
		symbolic, numeric and graphic methods. [Solve linear
		equations and inequalities flexibly by multiple methods.
		4.Use systems of equations in two or three variables, and
		solve by multiple methods.]
		1.The basic concept of logical gates & digital circuit
		2. Student should maintain electronic & digital & analog
	Digital Electronics-II	device & circuit
5		3. Knowledge of fundamental digital design & systematic
		method of analysis & design degital electornics
		1. Identify the parts of the computer system.
		2. Adequately explain functioning of computer components.
		3. Explain the process of problem solving using computer
		4. Design an algorithmic solution for a given problem
	Introduction to	5. Write a maintainable C program for a given algorithm.
	Programming Using	6. Trace the given C program manually.
	"C" - I	7. Write C program for simple applications of real life using
6		structures and files.
		8. Explain role of Operating system in computer system and
		applications of computer
		networks.
		1.Recognize and apply the most appropriate probability
	Descriptive Statistics -	techniques in particular circumstances.
		2.Understand, interpret, and communicate statistical
		reasoning from data using basic statistical
		terms, descriptive statistics, charts and graphs when

7		appropriate.		
		3.Recognize and evaluate the relationship between two		
		quantitative variables through simple linear		
		4.regression and correlation and be able to explain why		
		correlation does not imply causation.		
		5.Understand, analyze and interpret relationships in two-		
		way tables using chi-square tests.		
		1.Students should develop an appreciation of the need for		
		data to make good decisions		
		and an understanding of the dangers inherent in basing		
8	Probability and	decisions on anecdotal		
	Discrete Probability	evidence rather than on data.		
	Distributions	2.Construct and interpret graphical displays of distributions		
		of		
		univariate data.		
	B.C.S- I Semester-II			
		. Identify the parts of the computer system.		
	Introduction to	2. Adequately explain functioning of computer components.		
	Computer and	3. Explain the process of problem solving using computer		
	Data Processing- II	4. Design an algorithmic solution for a given problem		
1		5. Write a maintainable C program for a given algorithm.		
		6. Trace the given C program manually.		
		7. Write C program for simple applications of real life using		
		structures and files.		
		8. Explain role of Operating system in computer system and		
		applications of computer		
		networks.		
	Today de d'and	Identify the parts of the computer system.		
	Introduction to Programming Using	2. Adequately explain functioning of computer components.		
2		3. Explain the process of problem solving using computer		
	C - II	4. Design an algorithmic solution for a given problem		
Í				

		5. Write a maintainable C program for a given algorithm.
		6. Trace the given C program manually.
		7. Write C program for simple applications of real life using
		structures and files.
		8. Explain role of Operating system in computer system and
		applications of computer
		networks.
		1. Br familier with the defination & basic theory of grapg
		2.To study different type of graph
3	Graph Theory	3. To draw different types of graph 4. To use graph find the
		matices & equation
		1. Interprept a function form an algebric function 2. To
4	Calculus	provide basic knowledge of differinal calculas
		1.Maintain digital and analog devices and circuits.
		2. Analyze components associated with digital and analog
		electronic systems.
5	Electronics Devices	3.Demonstrate proficiency in the use of electronic
	and Circuits-II	equipment and devices.
		4. Assist in the design, operation, and troubleshooting of
		electronic systems.
		The student will be able to:
		1. Tell the history and development of digital electronics.
		2. Describe and demonstrate the use digital test equipment
		and its operating characteristics.
	Digital	3. Examine purpose of 555 timer and digital integrated
6	Electronics -II	circuits.
		4. Identify and describe the six basic logic gates and
		combinational circuits in digital electronics.
		5. Recognize the number systems use in digital logic design
		and its conversion
		6. Identify and describe flip-flop circuits.
7	Descriptive	Recognize and apply the most appropriate probability
	Statistics-II	techniques in particular circumstances.

		Understand, interpret, and communicate statistical	
		1.reasoning from data using basic statistical	
		terms, descriptive statistics, charts and graphs when	
		appropriate.	
		2.Recognize and evaluate the relationship between two	
		quantitative variables through simple linear	
		regression and correlation and be able to explain why	
		correlation does not imply causation.	
		3.Understand, analyze and interpret relationships in two-	
		way tables using chi-square tests.	
		1.Students should develop an appreciation of the need for	
		data to make good decisions	
	Continuous	and an understanding of the dangers inherent in basing	
8	Probability	decisions on anecdotal	
0	Distributions and	evidence rather than on data.	
	Testing of Hypothesis	2.Construct and interpret graphical displays of distributions	
		of	
		univariate data.	
	B.C.S- II Semester-III		
1		1. Analysis & evaluate the accuracy of common numerical	
		values	
	Numerical Methods	2. Establishing the limitations ,advantages & disadvantages	
		of the numerical method	
		3. To find approximate accurate value of given problem	
2		To understant input / output mechanism	
2	Computer	2. Understand the various part of a system	
	Organization		
2		3. To interface digital circuit to microprecessor	
3	Linear Algebra	1. Solve system of linear equation using multiple methods	
		2. Carry out matric operation including inverse &	
		determineant	
		3. Define the basic terms & concept of matrices & vectors	

4		1. Apply concept of Automatic control,including
	Computer Instrumentation I	measurement
		2. Design & implement system utilizing nalog or digital
		control device
		3. Visualization in process control system.
5	E	1.To understand what is mean by actual environment.
	Environment	2.To devlop project with respect to environmentstudy
6	Course Code: DSC-	1. Improving skill about data operation.
	301: Computer	2. Ability to handle database.
	Science Paper-V	3. Ability to design& develop proper database.
	Course Title:	4. SQL/MY-SQL helps to get knowledge about data
	Relational Database	operations
	Management System	
7	Course Code: DSC-	The student should - Understand basic concepts of object
	302: Computer	oriented programming. Able to use various control
	Science Paper-VI	structures to improve programming logic. Design classes
	Course Title: Object	and objects. Able to use constructor and destructor.
	Oriented	Utilize the OOP techniques like operator overloading,
	Programming using	inheritance, and polymorphism
	C++	
8	Course Code: DSC-	At the end of this course, student should be able understand
	401: Computer	the most basic aspects of data - structures including Stacks,
	Science Paper-VII	Queue, Linked list and Tree. Should able to understand
	Course Title: Data	different sorting and searching algorithms. Should able to
	structure using C++	understand implementations of linked list, stack and queue-
9	Course Code: SEC-I	1. To understand why Python is a useful scripting language
	:Skill Enhancement	for developers.
	Course - I Course	2. To learn how to install Python, start the Python shell
	Title: Python	3. To define the structure and components of a Python
	Programming	program.
		4. To learn to perform basic calculations, print text on the
		screen and perform simple control flow operations using if
		statements and for loops 5. To learn how to use lists, tuples,

		and dictionaries in Python programs 6. To learn how to
		reuse code with functions
	В	C.S- II Semester-IV
1	Course Code: SEC-II	Students who complete this course should be able to: 1.
	:Skill Enhancement	Understand basic concept of HTML.
	Course - II Course	2. Learn how to use HTML tags.
	Title: HTML (Web	3. Understand relationship of HTML and CSS.
	Technology)	
2	Course Title: Cyber	Students who complete this course should be able to:
	Security Essentials	1. Understand importance of cyber security and security
		management.
		2. Learn different security threats.
		3. Understand cyber security laws and importance of
		security audit.
		4. Learn concept of wireless network security.
3		.To develop own algorithem for solving geometry problem
	Computational	2.Us e line point duality to develop efficient algorithm
	Geometry	3. Apply geometry technique to real world problem
4	Operation Research	1.Develop a report that describe the model
		2. Mathematical optimization technique
		3. Write computer program to implement algorith & solve
		problem
5	Microcontroller	1.The general construction of microcomputer system
		2. To desgin, build & test digital electronic circuit &
		microcontroler system.
		3. Develop software for microcontroller system susing
		high level prograaming language
6		1.Able to develop, understanding of contrction & working
	Computer	of different measuring instrument.
	Instrumentation II	2. To design a variety of electronic & computer based
		device.

		3.Write simple computer programme for digital data
		acquistion & process control
7	Env.Science	To understand what is mean by actual environment .To
		devlop project with respect to envirnonmentstudy
	В.	C.S- III Semester-V
1	Course Code:DSE-	After completion of this course student will be able to
	501: Computer	1.Implement Object oriented concepts using java
	Science Paper- IX	2.Develop Object oriented software application
		3.Develop multithreading applications
	Core Java	4. Handle exceptions while executing programs
		4. Trandic exceptions with executing programs
2	Course Code:DSE-	: After completion of this course student will be able to
_	502: Computer	1.Understand working of .Net Framework
	Science Paper-X	2.Demonstrate concept of object oriented programming
	C#programming	using C#
		3.Study importance and applications of exception handling
		4.Understand working of file handling in C#.
3	Course Code:DSE-	After completion of this course student will be able to
	503: Computer	1.Understand the problem domain to choose process models
	Science Paper- XI	correctly.
	Course Title:	2Choose software projects using appropriate design
	Software Engineering	notations.
		3.Measure the product and process performance using
		various metrics.
		4.Evaluate the system with various testing techniques and
		strategies
		5Able to analyze, design, verify, validate, implement, and
		maintain software systems.
4	Course Code:DSE-	After completion of this course student will be able to

	504: Computer	1.Develop an appreciation for what is involved in learning
	Science Paper-XII	models from data.
	Course Title:	2.Understand a wide variety of learning algorithms.
	Machine Learning	3.Understand how to evaluate models generated from data.
	Part- I	
5	Course Code:DSE-	After completion of this course student will be able to
	505: Computer	1.Identify key considerations in selecting various
	Science Paper-XII	transmission media in networks.
	Course Title: Data	2.Familiar with switching and routing techniques in
	Communication	networking.
		3.Understand different data communication modes.
		4. Understand OSI model and networking protocols.
6	Course Code: AECC-	After completion of this course student will be able to
	E English Paper-III	1.Identify key considerations in selecting various
	English for	transmission media in networks.
	communication-III	2Familiar with switching and routing techniques in
		networking.
		3.Understand different data communication modes.
		Understand OSI model and networking protocols
		The state of the s
6	Course Code:DSE-	completion of this course student will be able to
v	601 computer science	1.Develop GUI using Java
	paper-XIII	2.Handle Database connectivity using java
	Advanced Java	3.Develop dynamic web pages using servlet and JSP
	Tuvaneca gava	4.Develop client-server application
		T.Develop enemi-server application
	_	
	В.	C.S- III Semester-VI
1	Course Code: DSE-	After completion of this course student will be able to
	602	1.Understand working of Asp.Net web application

	C	2 Damanda Asa Natarana da 1
	Computer Science	2.Demonstrate Asp.Net server controls.
	Paper- XIV	3.Study database operations using ADO.Net.
	ASP.NET	4.Understand importance and working of state management
2	Course Code:DSE-	After completion of this course student will be able to
	603 Computer Science	1.Implement the basics of Project Management.
	Paper- XV	2. Choose correct Scheduling Techniques as per the
	Software Project	software.
	Management	3.Develop Team Development skills and reduce conflicts.
		4.Implement various Software Quality Standards.
		5.Using CASE tools, Software Re-Engineering for creating
		efficient softwares.
3	Course Code:DSE-	After completion of this course student will be able to
	604 Computer Science	1.Understand complexity of Machine Learning algorithms
	Paper- XVI Machine	and their limitations;
	Lreaning Part-II	2.Understand modern notions in data analysis oriented
		computing;
		3. Apply common Machine Learning algorithms in practice
		and implementing their own;
		4.Perform distributed computations;.
4	Course Code:DSE-	After completion of this course student will be able to
	605 Computer	1.Familiar with network basics concepts like protocols,
	Science Paper- XV	topology etc
	Computer Networks	2.Familiar with OSI layered model services
		3.Understand with switching and routing concepts in
		networking technologies.
		4.Familiar with network security concepts
5	Course Code: AECC-	After completion of this course student will be able to
	F English Paper-IV	1.Comprehend the employment skills to have an effective
	9	r

	English for	first impression
	Communication- IV	2.Construct effective technical reports and prepare effective
		presentations
		3.Use various interpersonal skills as per the need of
		situation and context
6	Course Code: SEC-II	After completion of this course student will be able to
	PHP Part- II	1.Create and call functions using PHP
		2.Create functions that take arguments and return values
		3.How error is handled using exception handling
		4.Display and handle HTML forms within a single PHP
		script

Palus Shikshan Prasarak Mandal's

ARTS, COMMERCE AND SCIENCE COLLEGE, PALUS

Name of Programme: Post Graduate Diploma in Computer Application.

Programme Outcomes (PO) of the programme P.G.D.C.A. are as follows:

After completing the P.G.D.C.A. course the students would be able to:

- 1) The main objective of the course is to impart adequate professional knowledge and computer skills so as to enable the candidates to take up careers in the field of Information Technology.
- 2) To equip with latest knowledge, skills pertaining to the tasks and responsibilities of Information Technology.

Program Specific Outcomes (PSO) of the programme P.G.D.C.A. are as follows:

After completing the PGDCA course the students would be able to:

- 1. Acquire the computer programming skills to take up careers in the field of Information Technology.
- 2. Prepare students to enhance skills pertaining to the tasks and responsibilities.

P.G.D.C.A.

	P.G.D.C.A. Semester-I		
Sr. No	Name of the Course	Course Outcomes	
1	Fundamentals of Computers	After Completion of the course students will be able to: 1. Students should be able to know, basic fundamental concepts of computers. 2. Have an understanding of the skills, abilities, and tools of computers.	
2	E-Commerce and HTML	After Completion of the course students will be able to: 1. Understand the fundamentals of Electronic Commerce. 2. Understand Ecommerce Business.	
3	Visual Programming Part-I	After Completion of the course students will be able to: 1. Learners will be able to learn concepts of visual programming. 2. Learners will be able to design and develop applications using .net.	

P.G.D.C.A.

4	Programming using 'C'	After Completion of the course students will be able to: 1. Understand basics of C language. 2. Understand how to make programs using C language.
5	RDBMS with Oracle Part- I	After Completion of the course students will be able to: 1. Understand RDBMS Terminologies. 2. Understands how to write queries in database.

P.G.D.C.A. Semester-II

Sr. No.	Name of the Course	Course Outcomes
1	Office	After Completion of the course students will be able to:
	Automation Tools	1. Understand all office automation tools.
		2. Understand how to work in word, excel and
		PowerPoint tools.
2	Web Designing	After Completion of the course students will be able to:
	with PHP and MySQL	1. Understand how to design web applications using
		PHP.
		2. Understand how to work with MYSQL.
3	Visual Programming	After Completion of the course students will be able to:
	Part-II	1. Learners will be able to understand concept of VB.net.
		2. Learners will apply the Concepts of VB.net practical approach.

P.G.D.C.A.

4	Advanced	After Completion of the course students will be able to:
	Programming using 'C'	1. Understand advanced concepts of C Language.
		2. Implementation of C language Concepts in
		Programming.
5	RDBMS with	After Completion of the course students will be able to:
	Oracle Part-II	1. Understand the advanced concepts of RDBMS.
		2. Implementation of RDBMS advanced concepts in database.
6	Practical	After Completion of the course students will be able to:
		Implementation of practical knowledge of
		academic programming subjects.
		2. Enhance Practical Knowledge.
7	Project Work	After Completion of the course students will be able to:
		1. To design and develop an academic project report.
		2. To experience project work regarding any organization.

Palus Shikshan Prasarak Mandal's

ARTS, COMMERCE AND SCIENCE COLLEGE, PALUS

Name of Programme: Master Of Computer Science(M.Sc(cs))

The **Programme Outcomes** (PO) of the programme M.Sc(cs) are as

follows: After completing the M.Sc course the students would be able to:

At the end of the Master of Science (Computer Science) Programme, graduating Students/graduates will be able to:

- 1. Communicate computer science concepts, designs, and solutions effectively and Professionally
- 2. Apply knowledge of computing to produce effective designs and solutions for specific Problems
- 3. Identify, analyse, and synthesize scholarly literature relating to the field of computer science Use software development tools, software systems, and modern computing platforms.
- 4. Prepare for academic roles through NET/SET/PhD
- 5. Apply design and development principles in the construction of software systems of varying complexity.

Program Specific Outcomes (PSO) of the programme M.Sc (cs) is as follows:

- 1. Demonstrate understanding of the principles and working of the hardware and Software aspects of computer systems.
- 2. Ability to understand the structure and development methodologies of software Systems.
- 3. Possess professional skills and knowledge of software design process. Familiarity and Practical competence with a broad range of programming language and open source Platforms.
- 4. Be acquainted with the contemporary issues, latest trends in technological development and thereby innovate new ideas and solutions to existing problems

	M.Sc-I Semester-I			
Sr. No	Name of the Course	Course Outcomes		
1	CC-101: Design and Analysis of Algorithms	After Completion of the course students will be able to:		
		1. Analyse the asymptotic performance of algorithms.		
		2. Demonstrate a familiarity with data structures and		
		algorithms.		
		3. Compare algorithms based on time & space complexity.		
		4. Employ graphs to model real life problems, when		
		appropriate. Develop algorithms that		
		employ graph computations as key components, and analyse		
		them.		
		5. Mapping of data structures like Stack, Queue and Linked		
		List to real life problems.		
		6. Master the implementation of linked data structures such as		
		linked lists and binary trees.		
		7. Be familiar with advanced data structures such as balanced		
		search trees, hash tables, Red-		
		Black trees, Btrees.		
		8. Understand Divide & Conquer approach, Greedy algorithm,		
		Backtracking approach for		
		algorithm design.		
		9. Be familiar with Branch and Bound&Dynamic programming		
2	CC-102: Python Programming	After Completion of the course students will be able to:		
		1. Understand principles of Python		
		2. Understand object oriented programming		
		3. Demonstrate file handling techniques		
		4. Understand how Python can be used for application		
		development		
		5. Design Real life problems and think creatively about		
		solution of them		
		6. Apply a solution clearly and accurately in a program		
		using python		

3	CC-103: Database	After Completion of the course students will be able to:
	Management System	1.Define the terminology, features, classifications, and
		characteristics embodied in
		database systems.
		2.Demonstrate an understanding of the relational data model.
		3. Transform an information model into a relational database
		schema and to use a data
		definition language and/or utilities to implement the schema
		using a DBMS.
		4.Formulate, using SQL, solutions to a broad range of query
		and data update problems.
		5.Demonstrate an understanding of normalization theory and
		apply such knowledge to
		the normalization of a database.
		6.Use an SQL interface of a multi-user relational DBMS
		package to create, secure,
		populate, maintain, and query a database.
		7.Use PL/SQL for handing data in a database as per the user's
		requirement using
		programming features.
		8.Define various cursors and its implementation along with
		procedure and functions.
4	OE-104: Cyber	Realize the need for Cyber Security
	Security	2. Understand the need for Security in day to day
		communications
		3. Understand the vulnerabilities in the Network and Computer
		System
		4. Understand the cyber law and Cyber Forensics
	N	I.Sc-I Semester-II
	1	1.SC-1 Schiester-11
Sr. No	Name of the Course	Course Outcomes

1	CC-201: Web	After Completion of this course the student would be able to;
	Technology	1.To familiarize a student with windows and web-based
		application 2.To provide a student with the solid foundation of
		the syntax and semantics of C# as well as architecture of the
		.NET framework 3.Debug and deploy ASP.NET web
		applications
		4.Discuss the insights of internet programming and implement
		complete application over the web
		5.To inculcate skills pertaining to data access technology
		geared to facilitate the development of disconnected systems
		using .NET platform.
		6.To familiarize the student with the development of windows-
		based application using C#
		7.To familiarize the student with the development of web-
		based application using ASP.NET
		8. Handle various toolkit like AJAX 9. Utilize the concepts of
		JavaScript
2	CC-202: Advanced	1. The student will be able to develop distributed business
2	Java	applications, develop web pages using advanced server-side
		programming through servlets and Java server pages.
		biogramming uniough services and Java server bages.
		2. Demonstrate approaches for performance and effective
		2. Demonstrate approaches for performance and effective coding
		2. Demonstrate approaches for performance and effective coding3. Develop Java client/server applications.
		 Demonstrate approaches for performance and effective coding Develop Java client/server applications. Develop distributed applications using RMI
		 Demonstrate approaches for performance and effective coding Develop Java client/server applications. Develop distributed applications using RMI Develop component-based Java software using JavaBeans
		 Demonstrate approaches for performance and effective coding Develop Java client/server applications. Develop distributed applications using RMI Develop component-based Java software using JavaBeans Develop server side programs in the form of servlet
		 Demonstrate approaches for performance and effective coding Develop Java client/server applications. Develop distributed applications using RMI Develop component-based Java software using JavaBeans Develop server side programs in the form of servlet Understand the multi-tier architecture of web-based
		 Demonstrate approaches for performance and effective coding Develop Java client/server applications. Develop distributed applications using RMI Develop component-based Java software using JavaBeans Develop server side programs in the form of servlet Understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB) ,use
		 Demonstrate approaches for performance and effective coding Develop Java client/server applications. Develop distributed applications using RMI Develop component-based Java software using JavaBeans Develop server side programs in the form of servlet Understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB) ,use Struts frameworks, which gives the opportunity to reuse the
		 Demonstrate approaches for performance and effective coding Develop Java client/server applications. Develop distributed applications using RMI Develop component-based Java software using JavaBeans Develop server side programs in the form of servlet Understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB) ,use Struts frameworks, which gives the opportunity to reuse the codes for quick development and map Java classes and object
		 Demonstrate approaches for performance and effective coding Develop Java client/server applications. Develop distributed applications using RMI Develop component-based Java software using JavaBeans Develop server side programs in the form of servlet Understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB) ,use Struts frameworks, which gives the opportunity to reuse the

3	CC-203: Android	1.Understand Android Studio Environment and application
	Fundamentals	structure.
	Development	2. Demonstrate different layouts, views, activities and intents
		3. Testing and debugging of application.
		4. Design good user interface for the application.
		5. Able to store, retrieve and load data
		6.Demonstrate background tasks & events
		7. Understand publishing of app.
4	Elective-I:CE-204 CE-	1. To understand Software Project Models and Software
	204.1: Software Project Management	Management Concepts.
	1 Toject Wianagement	2.To understand the various methods of Cost Estimation.
		3. To Study about Software Quality Management.
		4.To Study about Emerging Trends in Software Management.
		5. To understand Project Evaluation.
	N	I.Sc-II Semester-III
1	CXXXX 204 A 400 1 I	4
1	SWM-301::Artificial Intelligence	
		2. Represent knowledge using AI knowledge representation
		techniques.
		3. Design Machine Learning solution to real life problems.
		4. Derive solutions for problems with uncertainty using Fuzzy
		theory. 5. Define a NLP problem and find a suitable solution to
		it.
		6. To develop a good understanding of all aspects of Natural
2	GG 202 A 1	Language Processing (NLP) and Genetic algorithm
2	CC-302: Advanced Web Technology	1. Students will be able to develop application using MVC
		2. Students will be able to understand Entity Framework
		3. Students will be able to understand Web API
		4. Students will be able to understand and use azure services
2	CC 202, DHD	5. Students will be able to understand the use bootstrap
3	CC-303: PHP	1. Understand how server-side programming works on the
		web. 2. PHD Pagia syntax for variable types and calculations
		PHP Basic syntax for variable types and calculations. Creating conditional structures.
		3. Creating conditional structures

		4. Storing data in arrays
		5. Using PHP built-in functions and creating custom functions
		6. Write PHP scripts to handle HTML forms.
		7. Understanding POST and GET in form submission. 8. How
		to receive and process form submission data.
		9. Reading and writing cookies.
		10. Create PHP programs that use various PHP library
		functions, and that manipulate files and directories.
		11. Analyze and solve common Web application tasks by
		writing PHP programs.
		12. Prepares the students to undertake PHP projects
		independently.
4	Elective-II: CE-304.1: Software Quality Assurance	1. Understand the basic tenets of software quality and quality
		factors.
		2. Be exposed to the Software Quality Assurance (SQA)
		architecture and the details of SQA components.
		3. Understand of how the SQA components can be integrated
		into the project life cycle.
